TECHNICAL DATA SHEET

CyFlow™ DLL4 Purified
Anti-Hu; Clone MHD4-46

REF **CV046130**

For Research Use Only.

Not for use in diagnostic or therapeutic procedures.

Specifications

Antigen	DLL4
Alternative Names	—
Clone	MHD4-46
Clonality	monoclonal
Format	Purified
Host / Isotype	Mouse / IgG1
Species Reactivity	Human
Negative Species Reactivity	—
Quantity [Concentration]	0.1 mg [1 mg/ml]
Immunogen	Recombinant soluble human DLL4

Specificity

The mouse monoclonal antibody MHD4-46 recognizes the extracellular domain of DLL4 (δ-like ligand 4) antigen, a type I transmembrane protein which plays an important role in vascular development.

Application

Based on published sources, this antibody is suitable for the following applications:

- Flow cytometry
- Functional assays

Storage Buffer

The reagent is provided in phosphate buffered saline (PBS) solution, pH ≈7.4, containing 0.1% (w/v) sodium azide.

Storage and Stability

Storage	Avoid prolonged exposure to light. Store in the dark at 2-8°C. Do not freeze.
Stability	Do not use after expiration date stamped on vial label.

Background Information

DLL4 (δ-like ligand 4) is one of five ligands of Notch receptors. It interacts with Notch1 and Notch4. DLL4 is up-regulated at sites of physiologic and pathologic angiogenesis, whereas its expression is low in most adult normal tissues. It is also highly expressed in human clear-cell renal carcinomas, bladder cancers, and breast cancers. Blocking the DLL4-Notch interaction seems to be a promising therapeutic approach.
